An All-Year University

Fall and winter, spring and summer, the University plant will be in full operation with all departments at work on regular courses lead-

The University will open for the 1917-1918 college year on Monday, October 1st, instead of in August, as in the past, and will be in operation for forty-eight weeks of six working days each. This all-year schedule makes possible the following favorable opportunities for students:

You may pursue your college work for six months of each year, earn money the other six months, continue your courses undisturbed, and graduate in five years. You may continue your college work the full forty-eight weeks

and graduate in three years.

The new schedule is arranged in periods of three months each.

Thus it is adapted to the special needs of those who must earn their way as well as those who are needed on farms at certain seasons, or who wish to teach or have business connections to maintain. The University adapts its schedule to the special needs of the student, instead of requiring the student to adapt his circumstances to the Uni-

For special information as to the advantages this new schedule offers in YOUR PARTICULAR CASE, write today to David R. Boyd, President, University of New Mexico, Albuquerque, N. M.
